

Reza Bazargan

Repslagargatan 17 B, S-118 46 Stockholm, Sweden | reza.bazargan@governo.se

Profile

Data strategist, analyst, and transformation leader with a PhD in Mathematics and 10+ years of experience in advanced analytics, AI development, and data-driven transformation. Trusted advisor and educator on AI and Large Language Models (LLMs), with a strong record of delivering trainings and workshops to diverse audiences. Expert at designing and implementing AI solutions that create measurable value and efficiency—bridging technical excellence with real organizational needs to enable sustainable digital transformation.

Education

PhD in Mathematics, Uppsala University (2011–2013) — Numerical methods & mathematical modeling.

Licentiate Degree, Stockholm University (2009–2011) — Applied mathematics & analysis.

Courses & Training

- AI & Advanced Analytics: LLM Engineering — Master AI, Large Language Models & Agents
- The Complete Agentic AI Engineering Course
- Power BI training, Företagsakademin

Skills & Tools

Machine Learning: Predictive modeling, NLP, segmentation; Retrieval-Augmented Generation (RAG)

Tech & Programming: Python, SQL, Hugging Face, yfinance, Plotly, OpenAI/Anthropic APIs, BeautifulSoup, GitHub

Mathematics & Statistics: Mathematical modeling, statistical analysis

Visualization & BI Platforms: Tableau, Looker, Google Data Studio, HEX, Mixpanel, Gradio, Power BI, Power Query

Reporting: Automated reporting pipelines, KPI tracking, interactive dashboards

Leadership & Operations: Strategic planning and roadmaps; agile project & change management; stakeholder management & presentation; team development and coaching

Business & Martech: CRM: Salesforce, Custome.rio, Planhat, Salesloft; Analytics: Google Analytics, Adobe Analytics, Mixpanel; Marketing: 6sense, Google Ads, Facebook Ads

Professional Experience

Governo Insikt AB — Senior Data Strategist & Project Lead (2025–present)

Mentimeter, Stockholm — Sales & Marketing Analytics Manager (2022–2024)

Tallink Silja AB — Growth Manager, Sales & Marketing Analytics (2021–2022)

Tallink Silja AB — Head of Revenue Management (2016–2021)

Selected Projects & Achievements

Governo Insikt AB — Senior Data Strategist & Project Lead

- Develop AI and LLM strategies; design and deliver trainings and AI workshops.
- Product Track & Internal Product Development (2025–ongoing): Project lead for “Product Track,” a strategic initiative to identify, define, and build scalable products that create tangible value for the public sector.
- Data-driven KPI System (2025): Designed and implemented a comprehensive approach and system to track activities and key metrics across the company.
- Advisor and coach to internal teams on AI development and process integration—covering skills development, code reviews, troubleshooting, and evaluation of emerging AI technologies.

Mentimeter — Data-driven Transformation & Team Building

- Designed and implemented comprehensive data strategies, establishing a unified “single source of truth” across the entire customer journey.
- Built and led the company’s first dedicated data analytics team, including recruiting data analysts and data scientists.
- Recruited and established Tallink Silja’s first data scientist role, with strategic impact across the business.

Advanced Analytics & Predictive Models

- Developed and deployed predictive revenue models using ML methods and Meta’s Prophet, with automated daily updates in Looker.
- Designed and implemented an end-to-end lead scoring system for both acquisition and retention, fully integrated with CRM platforms.
- Executed advanced customer segmentation using ML as a foundation for personalized communications and offers.

Tallink Silja — Data Democratization & Business Development

- Led the implementation of Tableau as the enterprise BI platform, enabling data-driven decision-making across the organization.
- Built KPI frameworks and real-time dashboards to track business performance.
- Established structured processes for analysis and reporting, streamlining decision-making at all levels.
